ANNUAL INDEX

Abeyaratne, Rohan and Knowles, James K. *On an integrodifferential equation arising in a theory of phase transitions in solids*, 761

Ames, Karen A. and Payne, Lawrence E. *Continuous dependence results for a problem in penetrative convection*, 769

Andersson, Lars-Erik and Klarbring, Anders. *On a class of limit states of frictional joints: formulation and existence theorem*, 69

Andreou, Elias and Dassios, George. *Dissipation of energy for magnetoelastic waves in a conductive medium*, 23

Baldoni, F. and Rajagopal, K. R. *Conditions of compatibility for the solid-liquid interface*, 401

Caffarelli, G. Vergara. *See* Rosati, M.

Cannon, John R. and Matheson, Alec L. *A free boundary value problem related to the combustion of a solid: Flux boundary conditions*, 687

Chan, C. Y. and Kong, P. C. *Channel flow of a viscous fluid in the boundary layer*, 51

Chiriţă, Stan. *On Saint-Venant's principle in dynamic linear viscoelasticity*, 139

Choi, Y. S. and Lui, Roger. *An integro-differential equation arising from an electrochemistry model*, 677

Choksi, Rustum. *The singular limit of a hyperbolic system and the incompressible limit of solutions with shocks and singularities in nonlinear elasticity*, 485

Christakos, George and Hristopulos, Dionissios T. *Stochastic radon operators in porous media hydrodynamics*, 89

Dassios, George. *See* Andreou, Elias

Day, W. A. *On rates of propagation of heat according to Fourier's theory*, 127

———. *A note on the propagation of temperature disturbances*, 565

Demay, Y. *See* Nouri, A.

Dhondt, Guido and Köhl, Manfred. *On the force between a dielectric cylinder in a constant electric field and a conducting half space*, 347

Dowerah, S. *See* Sachdev, P. L.

Feng, James Q. *Electrically charged conducting drops revisited*, 525

Ferrari, Carlo. *Unsteady perturbed flow at low Mach number of a viscous compressible fluid*, 157

Gao, Wenjie. *See* Yin, Jingxue

Giorgi, C. and Lazzari, B. *On the stability for linear viscoelastic solids*, 659

Golovaty, Dmitry. *The volume-preserving motion by mean curvature as an asymptotic limit of reaction-diffusion equations*, 243

Govorukha, V. B. *See* Melnikov, Yu. A.

Hansen, Scott W. *A dynamical model for multilayered plates with independent shear deformations*, 601

Hanson, Mark T. and Puja, Igusti W. *The evaluation of certain infinite integrals involving products of Bessel functions: A correlation of formula*, 505

Hee-Chang, Eun. *See* Udwadia, Firdaus E.

Hilgers, M. G. and Pipkin, A. C. *Kinetic energy of highly elastic membranes*, 791

Hristopulos, Dionissios T. *See* Christakos, George

Hu, Jiaxin. *A limiting viscosity approach to Riemann solutions containing delta-shock waves for nonstrictly hyperbolic conservation laws*, 361

Johnson, Kurt N. *Circularly symmetric deformation of shallow elastic membrane caps*, 537

Jüngel, Ansgar and Schmeiser, Christian. *Voltage-current characteristics of a pn-diode from a drift-diffusion model with nonlinear diffusion*, 707

Kalaba, Robert E. *See* Udwadia, Firdaus E.

Khasminskii, R. Z.; Yin, G.; and Zhang, Q. *Constructing asymptotic series for probability distributions of Markov chains with weak and strong interactions*, 177

Khuri, S. A. and Wang, C. Y. *Stokes flow around a bend*, 573

Klarbring, Anders. *See* Andersson, Lars-Erik

Knowles, James K. *See* Abeyaratne, Rohan

Köhl, Manfred. *See* Dhondt, Guido

Kong, P. C. *See* Chan, C. Y.

Kythe, P. K. *See* Puri, P.

Laurençot, Ph. *Weak solutions to a phase-field model with non-constant thermal conductivity*, 739

Lazzari, B. *See* Giorgi, C.

Liu, Zhuangyi and Zheng, Songmu. *Exponential stability of the Kirchhoff plate with thermal or viscoelastic damping*, 551
Loboda, V. V. *See* Melnikov, Yu. A.
Lui, Roger. *See* Choi, Y. S.
MacDonald, D. A. *On the computation of zeroes of* $J_n(z) - iJ_{n+1}(z) = 0$, 623
Matheson, Alec L. *See* Cannon, John R.
Melnikov, Yu. A.; Loboda, V. V.; and Govorukha, V. B. *Field of potential in a compound rectangle containing a linear inclusion*, 299
Nouri, A.; Poupaud, F.; and Demay, Y. *An existence theorem for the multi-fluid Stokes problem*, 421
Paulsen, William H. *Eigenfrequencies of the non-collinearly coupled Euler-Bernoulli beam system with dissipative joints*, 437
Payne, Lawrence E. *See* Ames, Karen A.
Philip, Varughese. *See* Sachdev, P. L.
Pipkin, A. C. *See* Hilgers, M. G.
Poupaud, F. *See* Nouri, A.
Puja, Igusti W. *See* Hanson, Mark T.
Puri, P. and Kythe, P. K. *Discontinuities in velocity gradients and temperature in the Stokes' first problem with nonclassical heat conduction*, 167
Qinde, Zhou. *See* Yong, Li
Rajagopal, K. R. *See* Baldoni, F.
Richardson, S. *On the classification of solutions to the zero-surface-tension model for Hele-Shaw free boundary flows*, 313
Rosati, M. and Caffarelli, G. Vergara. *On the existence of steady convex solutions to the regularized evolution problem of interfaces in the plane*, 151
Sachdev, P. L.; Dowerah, S.; Vaganan, B. Mayil; and Philip, Varughese. *Exact analysis of a nonlinear partial differential equation of gas dynamics*, 201
Schmeiser, Christian. *See* Jüngel, Ansgar
Shu, Chi-Wang and Zeng, Yanni. *High-order essentially non-oscillatory scheme for viscoelasticity with fading memory*, 459
Smith, S. H. *Slow oscillatory Stokes flow*, 1
Stoth, Barbara E. *Convergence of the two-phase Stefan problem to the one-phase problem*, 113
Sun, S. M. *On stability of liquid flow down an inclined plane*, 375
Tarzia, Domingo A. and Turner, Cristina V. *The one-phase supercooled Stefan problem with a convective boundary condition*, 41
Thomas, R. S. D. *Kinematic compatibility conditions of third order for a three-dimensional surface vector field*, 635
Ting, T. C. T. *On extraordinary semisimple matrix* $\mathbf{N}(v)$ *for anisotropic elastic materials*, 723
Turner, Cristina V. *See* Tarzia, Domingo A.
Udwadia, Firdaus E.; Kalaba, Robert E.; and Hee-Chang, Eun. *Equations of motion for constrained mechanical systems and the extended D'Alembert's principle*, 321
Vaganan, B. Mayil. *See* Sachdev, P. L.
Wang, C. Y. *See* Khuri, S. A.
Wang, M. Z. and Yan, G. P. *Boundary value problems of holomorphic vector functions and applications to anisotropic elasticity*, 231
Xianrui, Lu. *See* Yong, Li
Yan, G. P. *See* Wang, M. Z.
Yin, G. *See* Khasminskii, R. Z.
Yin, Jingxue and Gao, Wenjie. *Flows through nonhomogeneous porous media in an isolated environment*, 333
Yong, Li; Qinde, Zhou; and Xianrui, Lu. *Periodic solutions and equilibrium states for functional differential inclusions with nonconvex right-hand side*, 57
Zeng, Yanni. *See* Shu, Chi-Wang
Zhang, Q. *See* Khasminskii, R. Z.
Zheng, Songmu. *See* Liu, Zhuangyi
